## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1 – 15, drawn to a shared global word line MRAM structure, classified in class 365, subclass 66.
  - II. Claims 16 – 20, drawn to a method of forming a shared global word line MRAM structure, classified in class 438, subclass 3.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case it is believed that the method as claimed in II is one of the many possible methods for forming the shared global word line MRAM structure in I.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

### ***Conclusion***
